

The best choice 

- for conveyor applications
- for mining industry

EU-Roller Impact and **Picking Idler** is a superior designed Impact conveyor roller, manufactured from 4-6mm Marine Grade Aluminum tube, Elastone Impact absorption rings and assembled around the patented bearing cap assembly.

Impact and Picking Idler Rollers:

- ⊗ flexible
- ⊗ high resistance to wear
- ⊗ corrosive resistant roller body
- ⊗ longer bearing life
- ⊗ lighter mass of the roller
- ⊗ shock resistant bearing cover
- ⊗ longer ring life
- ⊗ robust design

Available sizes:

114, 127 and 133 mm diameter 20 & 25 series

160 and 180 mm diameter, 25 & 30 series

Standard, Anti-Seize, Side and Heavy Duty series

Length of rollers to suit the customer: 180 - 2050 mm
(2300 mm is under development)

Shaft end formed to customer needs

Also small batch production
